PROFESSIONAL SUMMARY

Full Stack .NET Engineer with 4+ years of experience building and modernising web applications with C#, ASP.NET Core Web API, Angular and TypeScript on PostgreSQL and SQL Server. Delivers features end to end on Nudge, a multi-channel customer-engagement platform on AWS, including an Angular 21 upgrade, template workflows, security hardening and localization. Uses AI-assisted development with Claude Code and prompt engineering in everyday delivery.

TECHNICAL SKILLS

Backend	C#, .NET 8, ASP.NET Core Web API, REST APIs, Entity Framework Core, Dapper, ADO.NET, Quartz.NET, FluentValidation
Frontend	Angular 21, TypeScript, RxJS, PrimeNG, Angular Material, HTML5, SCSS, Bootstrap, jQuery
Databases	PostgreSQL, Microsoft SQL Server, EF Core migrations, Stored procedures, OData
Cloud & DevOps	AWS (S3, Amazon Connect), Kafka, GitHub Actions, Azure DevOps CI/CD, Git
AI & Integrations	Claude Code, Claude API, Prompt engineering, Google Cloud Translation, Twilio, SendGrid
Testing & Tools	xUnit, Postman, Visual Studio, VS Code, SSMS

PROFESSIONAL EXPERIENCE

Full Stack Engineer

Jun 2025 – Present

Tilli Software (Utilli Software Technologies) — Hyderabad, India

Nudge: a multi-channel customer-engagement platform built on an ASP.NET Core (.NET 8) API, an Angular portal, PostgreSQL and AWS.

Tech stack: C#, .NET 8, ASP.NET Core Web API, Angular 21, TypeScript, EF Core, PostgreSQL, AWS, xUnit

- **Angular 21 upgrade:** Upgraded the portal from Angular 18 to 21 in steps through 19 and 20, migrating 579 components and moving 474 templates to built-in control flow, and moved CI to Node 22, pairing with Claude Code.
- **Draft and versioned templates:** Built a draft workflow (save, draft, send test, activate, submit for approval) across the Email, SMS, Push, Print, Apple Wallet and IVR template APIs with ASP.NET Core, EF Core and PostgreSQL.
- **Template edit locking:** Implemented pessimistic locking with heartbeat keep-alive and automatic expiry (EF Core migrations, Angular idle detection) so two users cannot overwrite the same template.
- **AWS contact center:** Delivered Amazon Connect call-disposition reasons, a call-recordings report streamed from Amazon S3, and a Quartz.NET job that emails IVR recordings from S3.
- **Localization and AI costs:** Integrated Google Cloud Translation with a per-account language gate, request caps and a usage ledger that also records Claude token usage for billing, covered by 13 xUnit tests.
- **Security and access control:** Remediated penetration-test findings (session revocation, password policy, rate limiting, FluentValidation input checks) and added project-level access control across about 30 controllers.
- **Audit and compliance:** Extended EF Core audit logging with coverage enforced by reflection-based xUnit tests, and added RFC 8058 one-click unsubscribe headers and cross-channel send suppression in PostgreSQL.
- **Real-time API:** Extended the public real-time API to send Email and SMS without a stored template, with request validation, rendering and phone-number normalization.

Software Developer (Full Stack .NET) **May 2022 – Jun 2025**

PrimEra Medical Technologies Hyderabad, India

Grew from Associate Software Engineer to Software Engineer.

Client: Prime Healthcare, a U.S. health system with 44 hospitals across 14 states.

Tech stack: C#, ASP.NET Core Web API, Angular 18, Dapper, SQL Server, ADO.NET, Azure DevOps, Postman

- **Coder Auditor:** Migrated the Coder Auditor module from ASP.NET Web Forms to Angular 18 and ASP.NET Core Web API with Dapper, overhauling the UI and enabling real-time tracking and reporting for stakeholders.
- **Retro Auditor:** Led the technology upgrade of the Retro Auditor module to Angular 18 and ASP.NET Core Web API on SQL Server, improving maintainability and scalability.
- **APIs and data:** Built REST APIs, batch jobs and SQL Server stored procedures, contributed to low-level design discussions, and validated every endpoint with Postman.
- **Delivery:** Supported releases through Azure DevOps CI/CD pipelines and delivered user stories on schedule.
- **Legacy systems:** As Associate Software Engineer, maintained the ADO.NET data-access layer, ASP.NET Web Forms pages and jQuery ASMX web services.

EDUCATION

Bachelor of Science (B.Sc.) **Jun 2018 – Nov 2021**

Pithapur Rajah's Government College, Kakinada (Adikavi Nannaya University) Kakinada, India

CERTIFICATIONS

- **Generative AI Essentials: Using LLMs to Work with Data** – IBM SkillsBuild (Credly badge), Aug 2026
- **AICTE | IBM SkillsBuild Academic Internship – Data Analytics with AI** – IBM SkillsBuild, Aug 2026
- **Data Science Internship** – Thiranex, Jul – Aug 2026 (ID THX-AUG0126-010)
- **Cyber Security Internship** – Thiranex, Aug – Sep 2026 (ID THX-AUG2126-126)
